

Dashboard 6: Executive 360° Performance & AI Governance

This dashboard provides a unified, executive-level view of logistics performance, predictive risk, financial impact, and AI governance.

Objective

- 1 Provide a unified view of performance, cost, and risk.
- 2 Enable fast decision-making for leadership.
- 3 Ensure AI model transparency and trust.

Executive KPI Summary

- 1 Overall SLA Performance – On-time delivery rate.
- 2 Total Logistics Spend – Total shipping cost.
- 3 Total SLA Penalty – Cost lost due to SLA breaches.
- 4 Total Risk Exposure – Financial risk based on predictions.
- 5 AI Confidence Index – Model reliability indicator.
- 6 Enterprise Health Score – Overall system health.

Performance vs Prediction

- 1 Confusion Matrix compares actual vs predicted outcomes.
- 2 Risk vs Cost scatter identifies high-risk expensive shipments.

Strategic Health Scorecard

- 1 Operational Health – SLA performance and delay control.
- 2 Financial Health – Cost and penalty efficiency.
- 3 Predictive Health – Model accuracy and recall.
- 4 Enterprise Score – Combined health indicator.

AI Governance

- 1 Bias Check ensures fairness across regions.
- 2 Feature Importance shows key risk drivers.
- 3 Model Metadata provides transparency.

Executive Actions

- 1 Renegotiate high-risk carriers.
- 2 Optimize high-risk routes.
- 3 Reduce penalty exposure.
- 4 Leverage AI insights for planning.

Business Impact

- 1 Improved visibility and control.
- 2 Reduced financial loss.
- 3 Better decision-making.
- 4 Increased trust in AI systems.
